

Engineered Coating Systems for the Built Environment

Armorize with AbShield™

Breathable Primer for Graffiti Coverage on Building Materials

MASK®

AbShield™ Mask® is designed to be applied to interior and exterior walls, ceilings and associated building material surfaces.

The coating dries quickly to an extremely durable odor absorbing layer that completely covers stains and battles graffiti while providing flame resistance.

The coating can be applied to the surface of concrete, stucco, brick, wood, metal, masonry, drywall and much more.

With a water-vapor permeability rating of over 40 as verified by an independent testing lab, the substrates can still breathe while the coating works.

AbShield™ Mask provides excellent one coat hide and can be applied to cover almost any undesirable markings. Stains and marks are completely covered.

Uniquely designed in a light gray shade to allow easy coverage by lighter shades of paint and enhancing the depth of additional darker shades making it an ideal surface primer.

Coatings are formulated with anti-microbial / anti-fungal ingredients to protect the dried film layer.

"Exclusive technology for versatile coating performance, from the thought leaders at AbShield™."

"Superior Coatings. Superior Results."
